

# Delta Degreaser

Emulsifiable solvent based cleaner

Product code: D002

## Product Description:

Delta Degreaser is a blue coloured, low viscosity solvent cleaner with powerful degreasing properties.

Delta Degreaser is manufactured from a blend of hydrocarbon solvent and non-ionic emulsifiers, which provide a self-separating emulsion. It can be emulsified with water and may be either rinsed away or wiped off. It is suitable for most degreasing purposes.

## Benefits:

- Readily emulsifies with water
- May be diluted up to 5 times its volume for economical use

## Applications:

Delta Degreaser may be applied by brushing, wiping, low-pressure spray or by soaking in a tank. It should then be wiped, allowed to drain or rinsed away with clean water. It is suitable for use on metal, concrete, tiled or painted surfaces. It is not suitable for asphalt or bitumen surfaces.

## Typical Characteristics:

Appearance	Blue coloured liquid
Specific Gravity @15.6°C	0.83
Boiling Point °C	200-265
Flash Point °C (COC)	40
