

Excel 2124 Cliplube

Mineral oil based lubricant for use in the scaffolding industry

Product code: L167

Product Description:

Excel 2124 Cliplube is a superior low viscosity, neat lubricating oil. It is manufactured from highly refined paraffinic mineral oils, fortified with corrosion inhibitors. The base oils are solvent refined and exhibit excellent chemical and thermal stability.

Benefits:

- Light coloured
- Low odour
- Cost effective
- Very searching and will lubricate threads easily
- Prevents corrosion and sticking

Application:

Excel 2124 Cliplube is suitable for the lubrication of all scaffolding parts. The use of this product will facilitate easy and fast removal of scaffolding even when it has been erected for long periods of time.

Typical Test Data:

Specific Gravity @ 15.6°C	0.842
Kinematic Viscosity @ 40°C (cSt)	10.2
Flash Point COC (°C)	185
Copper Corrosion	Class 1a
Appearance	Water white to pale yellow liquid
